Society Billing And  
Accounting Service

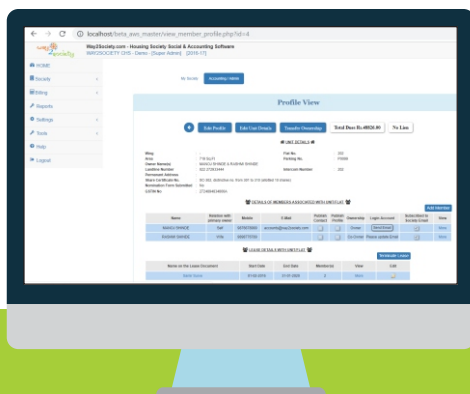

Society Management  
Portal And Tools

Security Manager  
Mobile App

Other Services  
For Society

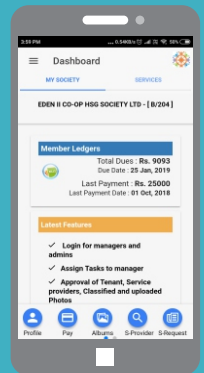

Way2Society.com is a cloud based society accounting and management portal customised for housing and commercial societies. Easy and user friendly interface is the key to the success of Way2Society.com. Being a cloud based portal, members can login to their account from anywhere in the world (similar to gmail) and can conveniently manage their bills plus communicate with society management and keep in touch with society affairs using Web or Mobile App. Other biggest advantage is that committee members can keep track of day to day society operations performed by their manager and accountant and can handle member complaint/communication effectively and get up to the minute financial reports whenever they want, giving them good grip on the society finances.

## FEATURES FOR MEMBERS

# SecurityManager

## SECURITY MANAGER FEATURES

Security Manager app is developed to track and record the traffic at society entrance gate. App is used by security guards and is integrated with Way2Society App and portal, so user doesn't have to install two separate Apps. Each visitor entry is easily recorded and members as well as manager can get visitor and staff reports.

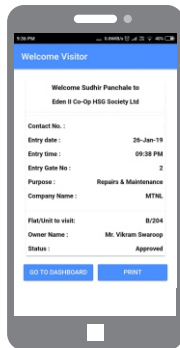

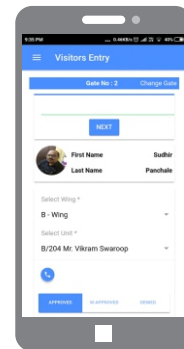

Integrated with Way2Society portal

Replace unreliable manual visitor register at gate.

Visitor picture is taken and mobile number gets verified with OTP authentication, record purpose of visit and car details.

Security can stop blacklisted visitors and staff.

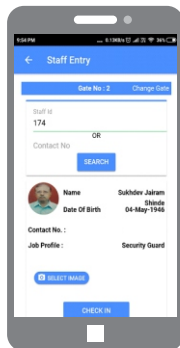

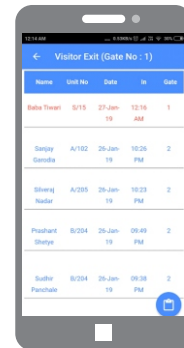

Residents can see visitor entry report and domestic staff attendance records

Residents can inform security about expected visitors or delivery.

Informing Expected visitor and OTP authentication.

Can monitor home visitors & domestic staff by sitting in office remotely.

Management can fetch attendance record of Security and housekeeping staff.

Daily and monthly Attendance reports of Security and Housekeeping staff.

Visitor and Staff Data integration and sharing between various entry gates.

Fetch visitor details and their entry records for incident investigation.
